Personal Background

Born on June 18, 1993 in Sanggau, Indonesia. Fluent in English, Indonesian, and Malay. Degree of Computer Science and have experiences in web development.

Strengths

I am not the one who has everything in my brain, I'm merely a simple man with passion for what I do in life. I believe hard work is a key that brings about good result, satisfaction and value in life. Everyday I challenge myself to do better while I keep my mind open to learn something new. While I'm able to work individually or in a group setting, I prefer the latter because I believe that success comes from listening to other people's ideas and collaborating with others. When great minds come together it can certainly bring about incredible outcomes, and I look forward to such opportunities the most.

Education

2012 – 2014	RMIT University Bachelor of Computer Science
2011 – 2012	Taylor's University Lakeside Campus Academic English
2005 – 2011	SMA Santo Paulus & SMPN 1 Tayan Hulu High School

Skills

I am working with:	
> PHP 7.0	MySQL
Laravel Framework 5.6	Google API
Codeigniter Framework 3.1	Facebook API
Wordpress 4.9	Stripe API
HTML5 & CSS	Twilio API
JQuery & AJAX	Mailgun
Javascript	Bootstrap
Tools I am using:	
Git	Vagrant

Work Experiences

- **Digital Symphony (March 2017 - Present)**

I am working in [Digital Symphony](#) as a back-end developer. It's a client-based company, there are various types of clients, including property agents, news portals, web based applications (internal / external), among other things. The use of technology depends on the needs of the client. I am working with WordPress, Laravel, and Codeigniter.

- **ZALORA (March 2015 - March 2017)**

I worked at Kuala Lumpur-based [ZALORA GROUP](#) as a software engineer. Most of the projects that I did were web-based applications with PHP, which made use of Codeigniter framework. Some of the major projects I developed during my time working with Zalora were Customer Service QA Tool, ZALORA Inventory System, Google Admin & HR Management System, ZALORA FAQ Page (front-end). Those projects required me to have advanced development skills, good coding techniques and also being involved in the system and database architecture.

- **Red Ape Solutions (Internship)**

When I interned with [Red Ape Solutions Sdn Bhd](#), I was assigned the role of Web Developer in their Technology Team for 3 months (2nd December 2013 to 21st February 2014).

During this internship, I was assigned to the Technology team as front-end and back-end developer. I worked on some projects, which are in the Website platform or Mobile Apps development platform. In the Mobile Apps side, I was placed as front-end developer. So designing, modifying, and editing the interface of the apps were part of my work. Whereas in Website Development I was assigned as the front-end and back-end developer for a number of projects. At the beginning, I was doing and designing some pages for the website using HTML and CSS. Then, after weeks I was assigned to work on the back-end side. This includes implementing all the functions for the pages and interacting with the database to print the data needed for the page. I also managed a [blog](#) for one of the company product called [Shopandbox](#).

Academic & Non-Academic Involvements

2015-Present	Volunteering as Teacher in Hiichiikok Foundation
2012 – 2014	Member of Sky Adventure Club
2010 – 2011	Member of Student Council (High School)

Motto

Believe in your dream and make it happens.
