Personal Background

Born on June 18, 1993 in Sanggau, Indonesia. Fluent in English, Indonesian, and Malay. Degree of Computer Science and have experience in leading a small team, development planning, designing system architecture, integration, testing and deployment.

Strengths

I am a simple thinker who always has passion for what I do in life. I believe hard work is a key that brings about good results, satisfaction and value in life. Everyday I challenge myself to do better while I keep my mind open to learn something new. While I'm able to work individually or in a group setting, I prefer the latter because I believe that success comes from listening to ideas and collaborating with others. When great minds come together it can certainly bring about incredible outcomes, and I look forward to such opportunities the most.

Education

2012 – 2014	RMIT University
	Bachelor of Computer Science
2011 – 2012	Taylor's University Lakeside Campus
	Academic English
2005 – 2011	SMA Santo Paulus & SMPN 1 Tayan Hulu
	High School

Work Experiences

- **ZALORA (March 2015 - Feb 2017)**

  I worked at Kuala Lumpur-based ZALORA GROUP as a software engineer. Most of the projects that I did were web-based applications with PHP, which made use of Codeigniter framework. Some of the major projects I developed during my time working with Zalora were Customer Service QA Tool, ZALORA Inventory System, Google Admin & HR Management System, ZALORA FAQ Page (front-end). Those projects required me to have advanced development skills, good coding techniques and also being involved in the system and database architecture planning.

- **Digital Symphony (March 2017 - August 2018)**

  I worked in Digital Symphony as a back-end developer. It's a digital agency company, there are various types of clients, including property agents, news portals, web based applications (internal / external), among other things. The use of technology depends on the needs of the client. I am working with WordPress, Laravel, and Codeigniter.

- **UniPin (August 2018 - Present)**

  I am working in UniPin as Senior software developer. Responsibility to all aspects of the ongoing software development from the initial specification, scheduling, distribute tasks to the team, development, integration, testing, deployment and maintaining.

Fun Facts

Skills	✓ PHP | Object Oriented ✓ Basic Linux (LAMP) ✓ MVC Frameworks (Laravel, Codeigniter) ✓ Databases (MySQL) ✓ Payment Gateway ✓ Design Restful APIs ✓ Creating Microservices	✓ Facebook APIs ✓ Google APIs ✓ Wordpress ✓ HTML & CSS ✓ jQuery ✓ Bootstrap ✓ JavaScript
In Progress	✓ AWS & Google Cloud ✓ Agile	✓ Team Lead ✓ Project management
Tools	✓ Git ✓ PhpStorm	✓ Vagrant ✓ Microsoft Team
